LIMITED YELLOWING

THREE-DIMENSIONAL
CREATIVITY

TWO-PART CLEAR GLOSS CASTING RESIN

An inspiration, a liquid, a form: all your ideas can now take shape and become truly unique designs

Thanks to this system that combines a clear epoxy resin and a hardener with limited yellowing, you can now make small design objects, decorations and transparent compositions thanks to a wide variety of different shaped moulds. Metal, plastic, glass and wooden objects can now be set in resin, which will enhance their colour and brightness by transforming them into decorative handmade compositions.

Alternatively, the resin can be used to reproduce missing parts or details of objects.

The system consists of an extremely clear, two-part, gloss epoxy resin for interiors **QUL6283/00**, with limited yellowing and zero shrinkage, plus a quantity of **QHL6284/00** hardener equivalent to 30% of its weight.

Having first poured the resin into a mould, which is particularly thick, and waited for the resin to harden, the surface can then be polished.

Only pigmentation for indoor use should be used, with concentrated colours from the **XC1900/XX** series at a maximum dosage of 0.5%.

STRENGTHS

EXTREMELY CLEAR	COLOURLESS	LOW VISCOSITY
REDUCED HEAT IS CREATED DURING CURING	GREAT FLEXIBILITY	GOOD MECHANICAL RESISTANCE
LIMITED YELLOWING	POLISHABLE AFTER HARDENING	100% SOLID RESIDUE
