FOR DIFFERENT NEEDS

PEELABLE WATERBORNE COATINGS

Introducing a full range of peelable waterborne coatings designed for the protection during production and working processes, as well as handling and everyday maintenance.

AX1200/00

This product can be easily removed from the coated substrates it has been applied to. Especially suitable in the kitchen cabinet sector, **AX1200/00** protects polyurethane high gloss or polyester topcoats and melamine papers during production and/or transport. Application by roller or brush.

AXV2350/00

For the temporary protection in production of melamine paper covered items, **AXV2350/00** is the perfect choice. Even easier to remove, it helps protect damages or fingerprints that can occur with frequent handling of one-side coated items. Application by roller or brush.

AXL3892/00

A green product, made with resins produced from sustainable sources. **AXL3892/00** is the best solution when exceptional adhesion or chemical resistance are needed. Suitable for the long term protection of spray booth and other equipment, it facilitates and speeds up periodic cleaning. Application by spray or brush.

PRODUCT CODE	PROTECTION	SUBSTRATES	ADHESION	SUGGESTED QUANTITY	DRYING TIME (20 65% u.r.)
AXV2350/00	Short-term	Glossy topcoats, melamine papers	6,5	80-100 gr/m ²	1 h
AX1200/00	Short/middle-term	Glossy topcoats, melamine papers, glass	7	80-100 gr/m ²	1 h
AXL3892/00	Long-term	PVC, melamine papers, spray booths WB or SB coated surfaces	8	120-150 gr/m ²	1,5 h

NOTE: because of the wide variety of products available on the market, we always recommend a preliminary check to assess the suitability of this product on the substrate.
