

NEW VERSION OF HYDROPLUS PIGMENTED TOPCOAT

APPLICATION
VERSATILITY

GOOD DURABILITY

ABSENCE OF BLOCKING

AZ97**/XX

NEW VERSION OF HYDROPLUS AZ97**/XX PIGMENTED TOPCOAT

Pigmentable topcoat converter for exteriors, available in the NN/BB versions, designed for wooden frames and products exposed outdoors, and as a base for the outdoor water-based tinting system.

Peculiar characteristics of the product are the absence of "blocking" phenomena, the application versatility and durability over time thanks to the elasticity of the applied film. It has thixotropic properties and can therefore also be applied vertically in large thicknesses without the risk of dripping.

Possibility of reproducing any customized color through the Sayerlack tinting system. **AZ97**/NN** is a converter for dark pigmented to be used with the water-based pastes of the **XA2006/XX** series; **AZ97**/BB** is a light color converter can be used both as a white finish and mixed with **XA2006/XX** pastes.

The restyling of the product, improved its rheological characteristics making it easier to handle and has also made it more competitive on the market.

| TECHNICAL FEATURES | |
|--------------------|----------------------------------------------|
